AREA OF INTEREST

Backend (API handling)

EXPERIENCE

Summer Intern

Zoho

May 2022

Chennai, TN

- Implemented simple applications in java that used Google's OAuth, basic API handling, Java 8 features.
- Got influenced on reducing time complexity, code documentation and code refactoring on the applications by the team lead.

Software Developer Intern

Azentio

Feb 2023 - Current

Kochi, KL

- Succeeded in making back end applications that can communicate independently via APIs using Spring Boot.
- Assisted my fellow colleagues with their doubts, queries and made their work a bit easier.

PROJECTS

Jotaro

[Source code](#)

- Jotaro is a discord bot that is specialised in server management.
- Users can use this bot to manage and moderate the users with some basic moderating actions such as kick, mute, ban.
- Developed with the help of Node.js and a discord API wrapper library called DiscordJS.

My Portfolio Website

[Source code](#)

- gukkey.netlify.app/ is a responsive portfolio website I did while I was learning React JS
- This website is a short portfolio website with a short description about myself and links to the GitHub repository, my resume and a donation jar.
- Developed with the help of ReactJS, ViteJS, HTML/CSS and JS and currently being revamped to include multiple pages while being more minimalist.
