EXPERIENCE

Summer Intern May 2022
Zoho Chennai, TN

- Learnt basic API handling in Java along with the help of Postman.
- Learnt some advance topics like generic classes, lambda functions.
- Did some tasks involving Google's OAuth service in Java.

PROJECTS

Jotaro [Source code](#)

- Jotaro is a discord bot that is specialised in server management.
- Users can use this bot to manage and moderate the users with some basic moderating actions such as kick, mute, ban.
- Developed with the help of Node.js and a discord API wrapper library called DiscordJS.

My Portfolio Website [Source code](#)

- gukkey.netlify.app/ is a portfolio website I did while I was learning React JS
- This website is a short portfolio website for me with a short description of myself and links to the GitHub repository and a Buy me a coffee website.
- Developed with the help of ReactJS, ViteJS, HTML/CSS and JS.
